

Client Details:

Turnover	£28,000,000
Type	International Group

The client is a manufacturer and distributor of plastic compounds. The company had suffered a series of setbacks regarding performance and management resulting in a projected loss for the year.

Following our initial assessment the issues identified were as follows

- There was a lack of reporting information across the company, which prevented rapid, robust business decisions
- There was a lack of team working amongst the directors of the company
- Certain processes were protracted which prevented timely reporting

Input

- A team building exercise was completed
- A robust planning process was implemented
- Processes were realigned to facilitate production

Outcome

- The company is now generating higher levels of profitability. (2008)
- The planning process is considered an essential part of the management process, which involves higher levels of communication through weekly team meetings.
- The finance department was re-structured which now produces accurate reporting to acceptable time-scales
